

Dear Parents!

We would like to address the issue of **ECO-policies** at our pre-school.

1. **FACILITIES AND EQUIPMENT CLEANING** – the detergents that are used at VMS for cleaning are organic (ecological), which means that do not contain highly harmful chemical substances making them friendly to the environment and to the people. Organic detergents are used to clean and take care of the classroom shelves and materials, floor, windows, dishes, toilets, and sinks.
2. **FOOD** - breakfast, which is served to children in the morning, has many organic products. By a rough estimate organic products compose from one-third to a half of the ingredients which children consume at breakfast in VMS.
3. **ECO-EDUCATION** – our curriculum contains many effectively applied instructions on a variety of environmental education, ranging from positive attitude to nature (e.g. animals and plants) though economical use of products to recycling.

Basing on the above we are proud to call **Vilnius Montessori pre-School** an **ENVIRONMENTALLY-FRIENDLY School**.

With kind regards,
VMS administration
